DETAILED ACTION

Claims 1-27 are pending.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 24-27, drawn to a telephone network, classified in class 379, subclass 56.1.
 - II. Claims 8-23, drawn to a method of sending a call, classified in class 379, subclass 221.01.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing a telephone network for transmitting and receiving calls using a cordless unit, base station, and a modem. Invention II has separate utility such as providing a method of sending a call that employs routing protocols for a base station and modem based upon the range of a cordless unit to a nearby base station. See MPEP § 806.05(d).

Art Unit: 2134

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
